DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Naito (6690732) discloses an apparatus that relates to scene change detection (Naito: column 1, lines 7-10). This apparatus comprises "receiving macroblocks for an uncompressed image" (Naito: figure 1) and "encoding the image without changing the frame type of the image in response to the determination of a scene change and the frame type of the image" (Naito: column 3, lines 50-59, wherein it is well known in the art that I frames (frame type) cause scene changes). However, this apparatus lacks determining the macroblock type and the distribution of blocks as claimed. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
